

**Con Edison \$1.2 Billion Electrification Project**

**By Con Edison**

NEW YORK—On October 1, Con Edison marked the start of construction of its Reliable Clean City—Idlewild Project, which will support the electrification of John F. Kennedy International Airport, the Metropolitan Transportation Authority’s switch to electric buses, and electrification of buildings in Jamaica, Queens.

The company celebrated the milestone with a ceremony, attended by representatives of the New York State Public Service Commission, the Metropolitan Transportation Authority, the Port Authority of New York and New Jersey, elected officials, and community leaders.

“The Reliable Clean City—Idlewild Project represents a major milestone in our strategy to create a clean energy future where every New Yorker can share in the benefits of a reliable, climate-resilient grid, said Tim Cawley, Con Edison’s chairman and chief executive. “We’re proud to break ground on this project that will enable the electrification for downtown Jamaica, JFK

International Airport, and the MTA’s fleet of buses, while also increasing reliability for our customers, creating good jobs, and advancing New York’s climate goals.”

“We plan to achieve significant minority- and woman-owned business participation on the project and look forward to partnering with our elected and local community partners to achieve that goal,” Cawley said.

“Con Edison’s significant investment in modernizing the electric grid of Southeast Queens, in concert with the Port Authority’s historic investment at John F. Kennedy International Airport, is evidence of this community’s strong economic future,” said Port Authority Executive Director Rick Cotton. “We’re proud to be a part of the commitment to not just build new infrastructure for the community, but to do so in a way that improves the lives of the people who live here.”

“As the largest public bus system in North America, we are leading the way to a cleaner, more sustainable future one electric bus at a time,” said MTA Chair and CEO Janno Lieber. “MTA’s ambitious plan to transition to an all

**Reliable Clean City**

zero-emissions fleet by 2040 wouldn’t be possible without upgrades to the electric grid like the Reliable Clean City—Idlewild Project, which gives us the added power we need plus room to expand our program in the future.”

**Manhattan Tunnel Project**

**Gateway Development Commission RFP No. GDC23-005**

**Bid Date: November 7, 2024**

**Description of project:**  
 The Manhattan Tunnel consists of two separate mined tunnels to be constructed utilizing Sequential Excavation Methods (“SEM”) tunneling techniques in combination with in-situ ground improvements (e.g., ground freezing and jet grouting) from about 50 feet west of the Manhattan Bulkhead (“Bulkhead”) to an interface with the HYCC-3, within the Hudson Yards. The construction of two sets of shafts for support of tunnel excavation: the Temporary Shafts (located by the Manhattan bulkhead) and the 12th Avenue Shaft.

**Many bidding opportunities are available:** geotechnical instrumentation, haul and dispose soil, rodent control, photography, rebar fabrication, electrical sub, soil and water sampling, park restoration, office trailers, fencing, curbs and sidewalks, site work, security guard service, utility work, QA/QC inspections.

**Design-Build Services for LIRR West Side Yard Flood Mitigation Measures**

**MTA Construction and Development Contract No. 6401**

**Bid Date: February 3, 2025**

**Description of project:**  
 Design, furnish, construct, and install concrete perimeter flood walls, seepage cut-off barriers below the concrete flood walls, flood gates, deployable flood barriers, sump pumps, a tide gate chamber, drainage system improvements, workable aisles and a diesel generator, an automatic transfer switch, ancillary electrical equipment, and required communications.

This project will develop flood protection solutions for the West Side Yard in order to prevent and mitigate flooding of the LIRR Tunnels. The flood protection below the WSY perimeter will be accomplished via a combination of permanent flood walls and deployable flood barriers.

**Many bidding opportunities are available:** deep foundations, minipiles, jetgrout, sheeting, rebar installation, concrete supply, site work, electrical work, painting, paving, curb and sidewalk, site utilities.

If you are interested in bidding on this project, please contact Skanska’s Diversity and Outreach Coordinator: [Aislinn.Speranza@skanska.com](mailto:Aislinn.Speranza@skanska.com) • EOE/M/F/Vet/Disabled
