

Federal Emergency Management Agency

By FEMA

The Federal Emergency Management Agency (FEMA) is part of the United States Department of Homeland Security. FEMA's mission is to help people before, during, and after disasters. Floods, hurricanes, earthquakes, and forest fires, whatever the disaster, FEMA leads the federal government's response as part of a team of responders.

FEMA gives disaster assistance to individuals, families, and businesses whose property has been damaged or destroyed and whose losses are not covered by insurance. FEMA employs more than 20,000 people nationwide. Here's what you can expect from FEMA in each stage.

Before a Disaster

We work across the country every day before disasters happen to help people and communities understand and prepare for possible risks.

- **Promoting Preparedness**

We work with individuals and communities to build a culture of national preparedness through

active community engagement, trainings and education, and planning. Our national Ready campaign gives you the information and tools to be proactive and prepare for potential emergencies and disasters. Visit <https://www.ready.gov> to learn more. The FEMA App also makes it easy to plan for common hazards with simple slideshows that walk you through the steps to prepare.

• **Knowing Your Flood Risk**

Floods can happen anywhere and are the most common type of disaster. We can help you determine your flood risk and provide tools and resources, including flood maps, to help you take steps to protect your home. The National Flood Insurance Program (NFIP) is managed by FEMA. You can learn more about getting a flood insurance policy by visiting <https://www.floodsmart.gov/>. We also work with communities to manage flood risk through floodplain management and support coordination across all levels of government to protect citizens and property from flooding.

• **Helping Communities Be More Resilient**

We help communities become more resilient through emergency or disaster-related grant
